Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference characters not mentioned in the description: 4, 5 & 40-42. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. A substitute specification including the claims is required pursuant to 37 CFR 1.125(a). See the Notice of Non-Compliant Amendment mailed October 20, 2005.

A substitute specification must not contain new matter. The substitute specification must be submitted with markings showing all the changes relative to the immediate prior version of the specification of record. The text of any added subject matter must be shown by underlining the added text. The text of any deleted matter must be shown by strike-through except that double brackets placed before and after the deleted characters may be used to show deletion of five or fewer consecutive characters. The text of any deleted subject matter must be shown by

Art Unit: 3679

being placed within double brackets if strike-through cannot be easily perceived. An accompanying clean version (without markings) and a statement that the substitute specification contains no new matter must also be supplied. Numbering the paragraphs of the specification of record is not considered a change that must be shown.

- 3. The disclosure is objected to as failing to comply with 37 CFR 1.77(c) for failing to include section headings.
- 4. The disclosure is objected to because of the word "coupling" is misspelled throughout the specification.
- 5. The specification is objected to as failing to provide proper antecedent basis for the following claimed subject matter:
 - a. Claims 1 & 2, line 2: "shaft axes'
 - b. Claim 1, lines 6-19: all limitations therein
 - c. Claim 2, lines 7-11 & 13-19: all limitations therein

Claim Objections

6. Claims 1 & 2 are objected to because of the word "coupling" is misspelled throughout the claims.

Art Unit: 3679

Claim Rejections - 35 USC § 112

7. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

- 8. Claim 2 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.
 - a. Claim 2, line 24, recites the limitation, "bevel teeth (34) mounted on the input end-shafts (1)". However, no such structure is taught or contemplated by the specification. Instead, in the specification the bevel teeth 34 are described as being mounted on the sleeve 7. See page 4, lines 6 & 7.
 - b. Claim 2, line 35, recites the limitation, "bevel teeth (35) mounted on the output end-shafts (2)". However, no such structure is taught or contemplated by the specification. Instead, in the specification the bevel teeth 35 are described as being mounted on the sleeve 10. See page 4, lines 6 & 7.
- 9. Claims 1 & 2 are rejected under 35 U.S.C. 112, first paragraph, because the best mode contemplated by the inventor has not been disclosed. Evidence of concealment of the best mode is based upon the excessively poor quality of applicant's disclosure noted in detail in the notice mailed October 20, 2005. See MPEP § 608.01(h)

Art Unit: 3679

10. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

11. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 2 recites the limitation "the bevel teeth (28, 29)" in a line of text that appears to have been inserted after line 35. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

12. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

13. Claims 1 & 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Thompson, US 6,139,437. Fig. 1 shows a double universal joint comprising all the limitations of the claims including: two end shafts 101 & 121 having bevel teeth 111, 112 & 131, 132; a middle shaft 120; two input swingers 104 & 105 having bevel teeth 107 & 109 and parallel teeth 106 & 108; and two output swingers 124 & 125 having bevel teeth 127 & 129 and parallel teeth 126 & 128.

Conclusion

14. An examination of this application reveals that applicant is unfamiliar with patent prosecution procedure. While an inventor may prosecute the application, lack of skill in this field usually acts as a liability in affording the maximum protection for the invention disclosed.

Applicant is advised to secure the services of a registered patent attorney or agent to prosecute the application, since the value of a patent is largely dependent upon skilled preparation and prosecution. The Office cannot aid in selecting an attorney or agent.

A listing of registered patent attorneys and agents is available on the USPTO Internet web site http://www.uspto.gov in the Site Index under "Attorney and Agent Roster." Applicants may also obtain a list of registered patent attorneys and agents located in their area by writing to the Mail Stop OED, Director of the U. S. Patent and Trademark Office, PO Box 1450, Alexandria, VA 22313-1450

15. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Greg Binda whose telephone number is (571) 272-7077. The examiner can normally be reached on M-F 9:30 am to 7:00 pm with alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel P. Stodola can be reached on (571) 272-7087. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
